

## Hyde Marine Appoints Technical Marine Services as German and Swiss Agent for Hyde GUARDIAN Gold™ Ballast Water Treatment System

Agreement Expands Hyde Marine's Commitment to Meeting Demand for Ballast Water Treatment Systems in the European market.

PITTSBURGH, PA – February 20, 2019 – Calgon Carbon UV Technologies Division d/b/a Hyde Marine, has announced the appointment of TMS Hamburg Technical Marine Services GmbH (TMS) as its exclusive sales agent in Germany and Switzerland to help ship owners deploy the chemical-free Hyde GUARDIAN Gold™ Ballast Water Treatment System (BWTS) onto their new builds or existing vessels.

Hyde Marine, a wholly owned subsidiary of Calgon Carbon Corporation, a Kuraray Company, is one of the world's most experienced ballast water treatment (BWT) technology companies with more than 500 orders for its ballast water treatment system. The Hyde GUARDIAN Gold BWTS uses efficient filtration and ultraviolet disinfection to treat ships' ballast water to prevent the spread of invasive species from port to port.

TMS – Technical Marine Services was founded in 2002 with the principal aim to provide the maritime industry with a single, globally-available source for high-quality spare parts for German-made machinery. In addition to their partnership with Hyde Marine, TMS also serves as the agent for other marine equipment manufacturers in the seawater handling, oil/water monitoring, lubrication, and purification markets. TMS achieved ISO 9001 certification in 2002 and ISO 14001:2015 certification in April of 2018, both from DNVGL, as part of their overall goal to provide outstanding service to their customers. Since their start, TMS has grown to now employ 13 highly qualified and experienced employees, ready to serve the global fleet.

“Hyde Marine is excited to partner with TMS as our representatives in Germany,” said Chris Todd, Executive Director, Calgon Carbon UV Technologies. “TMS has demonstrated their commitment to excellence through certification under both ISO 9001:2015 and ISO 14001:2015. As a company focused on protecting the environment and providing the highest quality products to our customers, we look for partners that share our vision. TMS was the perfect choice.”

#### **About Hyde Marine**

With more than 100 years in the maritime industry, Hyde Marine, as part of Calgon Carbon UV Technologies, LLC, is a pioneer in the development of ballast water treatment systems. Since participating in the first treatment system in 1996, Hyde Marine has become the leading U.S. manufacturer and market educator regarding regulations, technology choice, installations, and sector challenges. Since its initial launch in 1998, the Hyde GUARDIAN® BWTS has rapidly emerged as the industry leader, featuring mechanical separation followed by UV disinfection. With more than 500 Hyde GUARDIAN units sold to date, installed on various types of ships, there is no doubt why their customers continue to Demand Hyde Marine.
